

Operations and Maintenance Manager

Waste-to-Energy Plant

Mid-Maine Waste Action Corporation (MMWAC), owns and operates a 200 tpd Waste-To-Energy Facility and related operations in Auburn, Maine, has a career opportunity for a motivated and experienced hands-on individual. This position will report to the Plant manager and oversee plant operations to insure maximum efficiencies and compliance with environmental regulations. You will also be responsible for managing routine and major maintenance activities. The O&M manager directs the activities of shift operators, in-house IE and mechanical employees, and outside contractors. The ideal candidate will have a minimum of 5 years of supervisory experience in a high-pressure solid fuel steam/electric generating facility. Experience in equipment maintenance and controls also necessary. A Bachelor of Science in Engineering or equivalent preferred. Good analytical, troubleshooting, and computer proficiency are necessary. Leadership and motivational skills a must. Possess, or ability to obtain State of Maine 2nd class Boiler License, ASME QRO and Site-Specific Chief Facility Operator Certification. Excellent benefits include health, life, and LTD insurance, 403(b) tax deferred retirement savings plan, and paid vacation and sick time. Please e-mail resume and cover letter to:
